About Rockridge Power & Light Company

Rockridge Power & Light Company (RPL) is an Indiana investor-owned electric distribution utility regulated by the Indiana Utility Regulatory Commission (IURC) as a public utility under IC 8-1-2. RPL is a wholly owned subsidiary of Rockridge Energy Group, Inc. The Company provides retail electric distribution service to more than 407,000 customers across 14 counties in the west-central region of Indiana.

RPL is exclusively an electric distribution company. It owns no generating units. The Company purchases its full-requirements wholesale power under a FERC-jurisdictional supply agreement and operates within the MISO footprint. RPL's owned infrastructure includes 69 kV subtransmission facilities (418 circuit miles) and 12.47 kV and 34.5 kV primary distribution facilities.

Organization & Operations

RPL employs approximately 1,450 people. The executive leadership team includes the President & Chief Operating Officer, Vice Presidents for Operations, Regulatory & Government Affairs, and Legal. Key operational departments include Distribution Operations, Metering, Customer Operations, Environmental Health & Safety, Compliance, and Regulatory Affairs.

Field line and service crews are internal RPL employees. Vegetation management along RPL rights-of-way is performed by contracted line-clearance firms. The Company's fleet consists of approximately 640 vehicles, including 210 aerial/bucket and digger-derrick units, with fueling capability at all five service centers.

The Meter Shop & Standards Laboratory at the Lafayette HQ campus handles meter accuracy testing and standards maintenance. The Distribution Control Center (DCC), also in Lafayette, operates 24/7 and coordinates grid monitoring, switching, and outage response across the entire service territory.

Key Operating Systems

System	Function
Customer Information System (CIS)	Billing, account management, service orders
Outage Management System (OMS)	Outage detection, crew dispatch, restoration tracking
AMI Head-End System (AMI HES)	Two-way communication with 371,200 advanced meters
